Our FREE catalog is here!

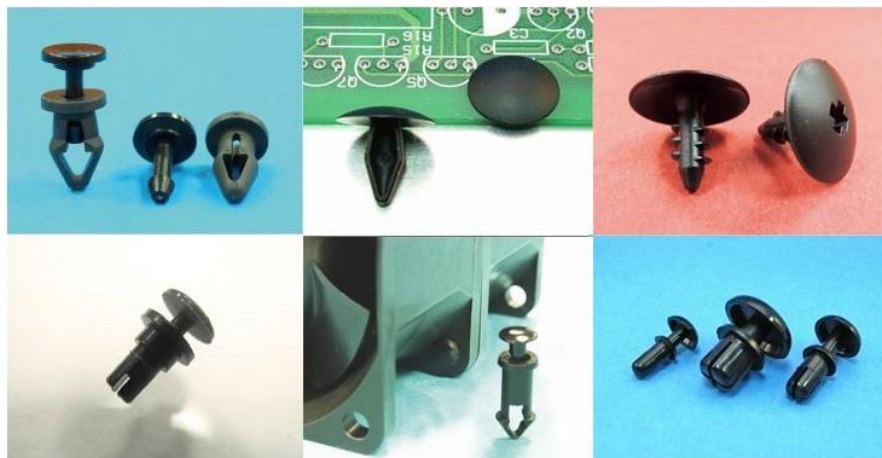

Our latest catalog has grown to include both new product lines as well as additional sizes to offer more choices for cable management, PCB support, LED accessories and more.

Please contact us via info@kangyang-europe.com or call [+31 \(0\)345 651937](tel:+3120345651937) and leave your contact details. We will make sure that our catalog reaches your desk as soon as possible!

Rivet Style Fasteners

Rivet Style Fasteners made by Kang Yang provide an inexpensive, fast and convenient method to join almost any material. Think of plastic, metal sheet material, insulating materials and circuit boards. We provide solutions for light-weight but also for heavier duty applications.

Our rivets have numerous applications and are available in a wide variety of styles, sizes and configurations to accommodate different materials and panel dimensions.

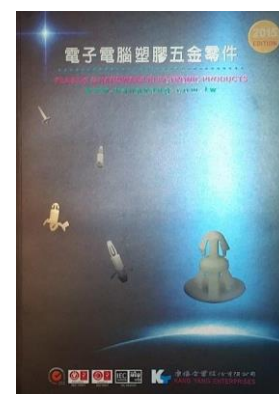

***Do you need Samples? Please ask us!
Do you need more information? Please call us!***

Typically, these rivet style fasteners are used in panel or part assembly applications in the automotive, electronics, industrial and furniture industries. A major advantage is that they can be installed quickly from one side of the panel.

Standard available colors are black and white. Kang Yang offers many head styles of which some are designed to give a great aesthetic appeal. There are also versions which are easily removable and reusable.

Depending on the rivet type these components connect panels together with a simple push or click or a turn and lock design for extra holding power in high stress or vibration conditions.

Cost effectiveness

The major benefits of utilizing Kang Yang's push fasteners are their cost effectiveness, time saving, easy assembly and the use of modern RoHS compliant materials like PA-66 and POM. Many of our designs are easily removable and reusable. We offer highly attractive cost levels to users of this type of fastening solutions.
